ZHONGTAI CREATES PERFECT LIFE

缔造完美生活

Company Introduction

Guangzhou Zhongtai Doors&Windows Co., Ltd. is a comprehensive and professional company integrating R & D, production, sales, installation and service. It specializes in fireproof rolling shutter, electric rolling gate, wind-resistant rolling door, polycarbonate door, stainless steel rolling door, Australian type mute door, European rolling gate, explosion-proof rolling door, garage door, industrial sliding door, aluminum rolling gate, aluminum rolling window, electric stainless steel door and high speed rolling door, etc.

Over 20 years, Zhongtai has been focusing on technological innovation, and introducing advanced technology from Europe and America. Through continuous improvement and progress, it always provides customers with high quality products and services. Relying on strong technical force, advanced production equipment, sound quality control system, skilled professional installation team, powerful marketing network and perfect after-sales service, Zhongtai has built up an undefeated brand in the competitive market. It is well received and approved by customers both at home and abroad. Zhongtai is willing to cooperate with you to open the door to success!

Adhering to the tenet of "knowing more and doing better", Zhongtai devotes itself to providing the perfect and comfortable safety enjoyment for the users, and develops a good cooperative relationship with the distributors, agents and end users in accordance with the principle of "building good faith and creating splendid future together".

Our products are applicable to business centers, industrial and mining enterprises, large exhibition halls of science and technology, government agencies and so on. Perfect product quality, excellent after-sales service and competitive price will give you full satisfaction.

Our goal: Customizing the best product for our customers in view of customer demands.

CERTIFICATE

Compared with ordinary rolling shutter doors, Zhongtai aluminum rolling door has competitive advantages in appearance, environmental protection and safety.

It can paint all kinds of colors and patterns on its surface, and cover coating, stereoscopic wood grain and sand grain and so on, which highlights its nobility, obviously improves the grade of your building and make your building stand out among buildings. It can effectively block sunlight radiation.

With humanized and intelligent design which integrates the sound insulation, anti-theft, anti-mosquito and other protective functions, it is applicable for high-grade villas, commercial streets, advanced residential buildings, banks, industrial plants and so on.

Hollow Aluminium Shutter Door and Window

The Hollow Aluminum Doors and Windows have the satisfactory mute operation performance, their security of the anti-theft rolling doors and windows can effectively prevent theft.

They are hollow without polyurethane inside even though its slat is double layers. It can help to prevent the sunlight in a more economic way which are the ideal choices for the shop, villa, supermarkets, etc.

Thermal Insulation Shutter Door and Window

The unique material and structure design of aluminum rolling doors and windows can help to effectively prevent strong light and ultraviolet radiation. It can completely solve the greenhouse effect produced by the sun, which is suitable for various climate and weather changes, and has a long-term protective effect on the indoor environment.

Ten reasons for choosing Zhongtai aluminium shutter window

1. Creating a warm and private space for you

By closing the shutter windows, you can keep your curious eyes out of the window, enjoying your free and private life.

2. Protecting you from the bad weather

The aluminum shutter window provides a powerful protection to your windows, whether it's windy, rainy, hail, or the scorching sun of summer, it always provides a comfortable living room. It also effectively protects your furniture, floors and wooden doors and windows from being exposed to intense sunlight.

3. Providing a barrier for you to sound insulation

The aluminum shutter window filled with fluorine-free polyurethane will effectively reduce the noise for you, and you will get into the sweet dream more quickly in such a quiet and sweet night.

4. Saving more energy for you

Due to the use of the cover system, Zhongtai shutter window of open installation series has eliminated the thermal bridge between the rolling shutter windows and the indoor to saving energy. Meantime, a strong air insulating layer would be formed between the glass windows and the shutter windows. If a hollow glass window is installed with a shutter window, its thermal insulation performance will be increased by more than 20%.

5. Providing a burglar barrier for you

Zhongtai aluminum shutter window provides a protective screen to your living room. If you choose the professional anti-theft series of Zhongtai rolling shutter products, for example, reinforced panel, reinforced bar, reinforced slider and anti-push device, then your property will be more powerfully protected. Relevant information could be consulted with the professional agent of Zhongtai.

6. Shutter window with concealed screens

Zhongtai skillfully integrates the rolling shutter in the cover device of the aluminum shutter window. It expands the practicability of the shutter window: in the summer, you can open the shutter window for ventilation while pulling down the screen to prevent the mosquito from entering. This also saves screen installation space and related investment.

7. Simulating the owner's living life by timer switch

The rolling shutter window driven by motor can control its opening and closing through programmable timing switch, so that even if you often do not stay home, go out for travel, the shutter window can open and close at the set time, creating a kind of effect that the owner at home to effectively prevent the thief.

8. Getting the most comfortable manipulations by wireless remote control

Motor driven shutter window can facilitate wireless remote control. At the same time, you do not need to open the wall to put wires and not damage your interior decoration. If the sun sensor is connected, your shutter window will automatically turn on or off according to the intensity of the set light.

9. Realizing group control of multiple shutter windows

A plurality of rolling windows driven by motors can realize simultaneous opening or closing of multiple windows by means of a group controller. And at any time you can change the group at will. Even the shutter windows of the entire building can be controlled by a small palm controller.

10. Zhongtai shutter window is the beautiful coat of your building

Zhongtai shutter window creates a new tomorrow for your room! By choosing different shapes of the cover and colors of the shutter, Zhongtai provides you with hundreds of combinations and possibilities to create a unique building facade for you.

STAINLESS STEEL ROLLING DOOR SERIES

Zhongtai stainless steel rolling gate, its design is humanized and its appearance is fashion, beautiful and high-grade. The surface adopts advanced pretreatment technology, it is with strong durability, anti-oxidation, rain and corrosion prevention, and a variety of colors and styles are available according to customers' demands. It is applicable for villas, commercial streets, residential buildings, banks, industrial plants and so on.

SECURITY ROLLER GRILLE DOORS SERIES

- ▶ Environmental Friendly
- ▶ Theftproof
- ▶ Fireproof
- ▶ 24h Advertising

Stainless steel shutter gate is a durable and practical product in the series of rolling gates in Zhongtai, made of stainless steel pipes, stainless steel hanging plates and sliding. It has the characteristics of transparency, beauty, theftproof, and 24 hours advertising, which is widely used in shops, banks, metros and so on.

POLYCARBONATE ROLLING DOOR SERIES

High Reliability

- * The polycarbonate has been experimented and tested that its ability of anti-collision is very strong, it uses special-purpose aluminum pipe for connection. Its unique design can greatly improve its anti-collision performance.
- * Shutter plate is tight in structure and excellent in sealing performance.

Clear Perspective

- * Excellent perspective effect.
- * Perspective degree is more than 80%, crystal-clear and transparent.
- * The perspective is clear enough to be used for 24 hours display window.

Fashion and beautiful

- * Elegant style, can be combined with commercial door decoration to create a high grade business atmosphere.

Flexible and convenient

- * Easy installation and convenient, providing electric and manual selection.

POLYCARBONATE FOLDING DOOR SERIES

The polycarbonate folding door is highly welcomed for its characteristics of beautiful appearance, novel style, diverse colors, easy to use, push and pull freely, and effectively save the occupancy space of doors, etc. The folding door has the features of light weight, heat insulation, moisture proof, fire proof, flame retardant, noise reduction, sound insulation, acid and alkali resistance, corrosion resistance and so on. It is easy to clean and also suitable for kitchen, bathroom, toilet and so on. Its installation is easy and fast, lifespan is long and it is easy to maintain. It has been widely used in office, shop, workshop, large area of heat preservation, insect protection, dust proof, shelter and isolation applications.

Composite Steel Fireproof Shutter

The composite steel fire proofing shutter is made of special processing, combining with the intelligent characteristic of modern industrial and civil architecture. Its quality reaches the international standard.

It is applicable the separation of corridor, open staircase, escalator, fire prevention and anti-theft in all kinds of industrial and civil buildings.

Double Rail Double Shutter Inorganic Super Fireproof Shutter

1. Soft texture, good curling performance, high tensile strength, corrosion resistance and moisture resistance.
2. The rolling shutter has the advantages of small volume, small space occupation and light weight (3.5kg/l), which can reduce the load bearing capacity of the building, especially for the manufacture and installation of large-span shutter doors.
3. No need for water spray protection, reducing the investment and occupying space of the water spray system.
4. Flexible start, low noise and reasonable structure. The appearance of shutter surface can be decorated.
5. The opening and closing of rolling door can be linked with fire control center, and it can also be self-contained, and it can be opened and closed by smoke and temperature sensor. It has both automatic and manual opening and closing functions.

Super Grade Inorganic Foldable Fireproof Shutter

The special grade inorganic foldable fireproofing shutter refers to the use of inorganic fireproof and heat insulation cloth as door surface, rolling shutter with steel rope and pulley as transmission, and the folding way to lift the door surface, and the span can be extended infinitely in the middle without a column, and it is good to keep the interior full space of the building in the irregular interval of fire prevention.

FIREPROOF DOOR & WINDOW SERIES

Fireproof Door

The fire door has the characteristics of smooth surface, beautiful appearance, flexible opening, strong and durable, convenient to use, safe and reliable. There are many types for fire doors, which can be customized according to customers demands.

Fireproof Window

Fire windows can isolate and prevent fire spread, there are two types of fire windows:one is fixed fire windows which can not be opened. That is, its surrounding is sealed and fixed. The other is movable fire window which can be opened and closed under the action of the fire window opening and closing device.

ALUMINIUM GARAGE DOOR SERIES

1. The decorative windows of door panels can be installed with transparent or colorful polycarbonate materials which is easy to remove .It makes your door more stereo with the design of concave and convex groove,more beautiful and stronger sealing performance.
2. Characteristics are high durability, heat preservation, thermal insulation,sound insulation and so on.
3. High quality torsion spring balances the weight of door panel and reduce the load of motor.
4. Three ways of opening:electric, manual and remote control.
5. Omni-directional remote control, remote effective distance, password can be set randomly of which repetition rate is 10 billion points.
6. The power off device is made up of a torsion spring manual system, and a power failure emergency lock is provided during power failure.
7. Automatic lighting equipment,the lights automatically delays to turn on for 5 minutes when switch the garage door , then automatically turns off.
8. The safety protection system automatically stops when the door goes up and automatically rebounds when it falls if meets any obstacle.

GARAGE DOOR SERIES SERIES

The solid wood door has a characteristic of warmth since ancient times. The wood-grain garage door produced by Zhongtai is not only gorgeous and exquisite, but also varies in style with personalized design which could meet the needs of different customers.

INDUSTRIAL DOOR SERIES

Industrial Rolling Door

The industrial rolling door is composed of a series of door panels, rising along the track. Industrial rolling door as a upgrade and replacement product of steel rolling door, it has good effects of thermal insulation, wind resistance, good sealing, sound insulation,etc. With characteristics of solid structure, beautiful appearance, saving space and simple operation. Industrial rolling door is widely used in workshop, warehouse, factory gate, logistics center, automobile shop and so on.

High Speed Rolling Door

High speed shutter door is a barrier door with rapid rise and fall.And its main function is quickly isolation, thus to ensure the air quality of the workshop without dust. It has the functions of heat preservation, cold preservation, insect-proof, windproof, dust proof, sound insulation, fire proof, anti odour, day lighting and so on. It is widely used in food, chemistry, textile, electronics, supermarket, freezing, logistics, storage and other places.

INDUSTRIAL DOOR SERIES

Industrial Sliding Door

Features

Safe and reliable, smooth operation:adopting the integral door frame structure ensures the safety of the door load-bearing structure and the smooth operation of the whole structure.

Less space occupied and easy to arrange.

Its noise is small and sealing performance is high, its appearance is light and door body is light.

The operating system can be equipped with button control, remote control, automatic operation and infrared safety protection system.

Infrared ray induction device installed on both sides of the door body, even if the door body is forced to open,the infrared induction device starts immediately and keeps the alarm when the person or object enters the door.The sensitive automatic alarm device will start the alarm immediately, no matter what tool is used to illegally push or pry the door body.

Hard Metal High Speed Shutter Door

Hard metal high speed rolling door is a kind of fast rolling door with hollow aluminium door slat. Its structure and performance are similar to fast soft rolling door,but it has the function of anti-theft. And it adopts the tension spring balance system to balance the weight of the door panel, which has better ability and efficiency than the fast soft shutter door.
